To whom it may concern,

10-3-2017

When I first met Tamara Shiloh, I was thoroughly impressed with her work. Her books from the Just Imagine... series are precisely the kind of books students today should be reading. Students of all backgrounds should be reading these books! Not only do they help enhance historical literature in a fun and engaging way for students of the information age, but they propagate the idea that all people deserve a place in the history books. Jaxon's adventures learning about real people in history, coupled with the Journal, Coloring Book and Workbook, deserve a place in primary libraries and classrooms everywhere!

Here at Girls Inc. of West Contra Costa County, we are so grateful to have found Tamara and her book series. We plan to use the books in our programming and keep them in our library for many years to come. It is always a great idea for children to be able to see themselves in literature and in a positive light, as it encourages them to dream big and grow up to be the best version of themselves. Girls Inc. inspires all girls to grow up Strong, Smart and Bold! These books will do the same thing for all children, and we cannot wait to have the rest of the series on our shelves as well.

Thank You, Tamara, for your gifts and talents. Thank You for sharing them with us!

Cristal Banagan,
Associate Director
